

5 EASY RULES FOR MULTI-LANE ROUNDABOUTS

1. Choose your lane in advance of the roundabout;

- Lane choice in advance of a multi-lane roundabout is no different than selecting a lane in advance of a signalized intersection.
 - If turning left, you must enter the roundabout from the left lane;
 - If turning right, you must enter the roundabout from the right lane;
 - If traveling straight, you can enter the roundabout from either lane.

2. Slow down and Yield to pedestrians

3. Yield to both lanes of traffic already in the roundabout

4. Remember you must not change lanes once you are in the roundabout

- If you enter in the left lane, exit in the left lane; and
- If you enter in the right lane, exit in the right lane.
- Refer to the brochure in the Related Content to see how to move turn by turn through the roundabout.

5. Give Trucks Plenty of Room

- The Route 8 / Smythe Street roundabout has been designed for large trucks and buses; however, drivers of these large vehicles should:
 - Straddle the entry lanes;
 - Use both lanes within the roundabout; and
 - Don't try and leave space for another vehicle to pass you.
- Drivers of passenger vehicles should never try and pass a large truck when approaching a roundabout or within a roundabout. Give Trucks Plenty of Room!
- Read the brochure in the Related Content to see how large trucks and buses should move through the roundabout.
