

TIPS TO REDUCE FLOODING RISK TO YOUR HOME DURING EXTREME RAINFALL

1 Know your system

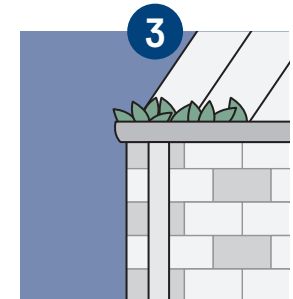

Additional Tip

Store valuable & hazardous materials in watertight containers or remove from basement.

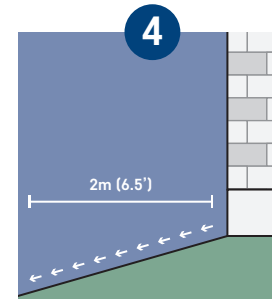

Please note that not all actions are applicable to each home and do not guarantee flood prevention.

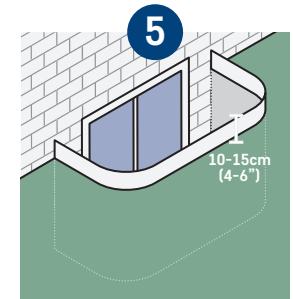

Remove debris from nearest storm drain, ditch, or culvert.

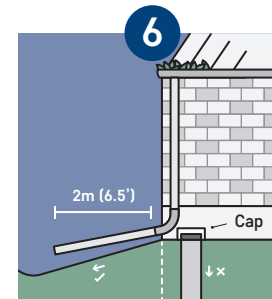

Clean out eavestroughs.

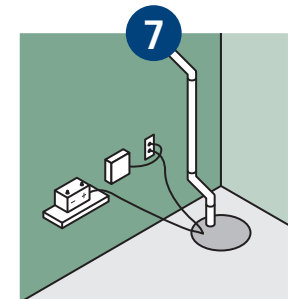

Correct grading to direct water at least 2m from foundation.

Install window wells to sit 10-15cm above ground & upgrade to water-resistant windows.

Disconnect downspouts and cap foundation drains. Don't let roof water go directly to your foundation.

Install a sump pump to protect your basement from water. Additionally, a backup pump & battery, tested regularly, will provide further protection for your home.
