

## Garbage and Waste Collection

### **Notice:**

With Covid-19 restrictions, we must not overwhelm Fero operators with unusually high volumes of waste. Curbside garbage collection is for household waste only. It is not intended for large items, hazardous waste, or construction debris. Commercial contracting is available for those wishing to dispose of larger volumes of waste or debris, i.e.: Spring cleaning or moving.

---

Fredericton's curbside garbage collection program provides convenient pick-up and disposal service of most household waste that is not recyclable. Residential solid waste including garbage and garden waste are collected.

Material NOT collected includes ashes, street rubbish, household furniture and furnishings, construction and demolition debris.

For those who choose to not participate in backyard composting, organic household material can also be included in the garbage that is collected.
